Hi Clary,

Thanks again for the information on the call.

I wanted to add another thing to the list of informational action items from the call:

I was hoping to get some clarification on the representativeness of water quality grab/composite samples from DMH 13.4. On the call it sounded like DMH 13.4 was not directly accessible for either flow meter installation or possibly even water quality sampling. You had mentioned at the end of last month that effluent sampling is now being conducted at DMH 13.4 under the currently effective permit. Could you describe in detail how effluent sampling is presently conducted to allow for both access and representativeness?

Also, for future reference, which of the following locations could be accessible for water quality sampling: DMH 13, DMH 13.1, DMH 13.2, DMH13.3, DMH 13.5, DMH 13.6, DMH 13.7, and DMH 13.8?

Please let me know if you have any questions in the meantime.

Undine Kipka
